アワビ

高級食材として知られるアワビには、天然もの、養殖場で生まれて海に放流されたもの、完全な養殖ものの3種類があります。実はこの3つは貝殻の色を見れば簡単に見分けることができるのです。

アワビの貝殻は、食べた物と同じ色になる性質があり、成長に従って外周に大きくなっていきます。自然環境では貝殻は赤茶色になりますが、養殖場では昆布やワカメや人工飼料ばかりを食べているので緑色になります。なので、天然ものは隅々までが赤茶色、養殖場で生まれて海に放流されたものは貝の頂上部分だけが緑色で全体の貝殻は赤茶色、完全な養殖ものは貝殻全体が緑色を帯びています。

Chapter 105:
Dom's ears

Ohh, thanks
for waiting
Asama-kun

It seems
like
you've
been
working
quite
hard.

Even amongst
my koushai
in the medical
faculty, you have
quite the
reputation.

I'm
very
happy.

Thank
you
very
much.

It's been
a while.
Ex-President
Shigemori

Melou University's
Ex-President
Faculty at Melou's
Hospital Professor
Hiraya Shigemori

Overlooking everyone in the medical faculty and making you my succeeding president* was the correct move.

*Note: The president of the university is elected from within all the teaching staff of the university.

The preparations for the wildlife laboratory are also going well.

And was also able to start up a night practice.

Yes—thanks to you, I was able to welcome our first physician—a veterinarian called Kurosawa Hoshino.

Is the reform of veterinary medicine that you wanted to do going well?

So how is it?

That's good. I see.

You

Ah, over-see the usual and a hot sake.

While having to watch over all 5 faculties of Meiou at the same time, you've been doing pretty well...

Treating people and treating animals. Though our fields are different, as another doctor, I understand what it is you want to do.

After all, being able to drink in the afternoon is one of the perks of having retired from the university.

Honestly speaking, I actually had some this afternoon with a cup of sake.

Abalone, you see. It's your favourite, is it not?

Yeah, as I thought, it's the best snack to go with sake.

Oh, oh, don't trust me too much like an old man!

But it's not good to drink too much. Please watch out for your body.

But actually...

It's this

Look, I don't really understand why, but I've had some bad lucks...

It's been bothering me a bit...

Well, it's probably not a sickness that'll kill me, so it's not really anything to be too worried about!

By the way, Azama-kun, I have a request to make of you—

I've had it examined at the medical faculty's hospital, and as a doctor myself, I've also done some thinking about it, but I can't figure out the cause of all...

That is a bit worrying...

I might be over-worrying about it but I figured I should have an expert look at it just in case

Could I have my cat examined at your place?

Lately, it seems like a bit of my Don's ears have been missing, as though they've melted a bit or something, so I think that it's some kind of dermatitis.

Oh really! That'll help a lot!

Understood, please have him examined at our hospital.

Ha
ha
ha
ha
ha

Well please
watch,
eventually I'll
definitely make
Isshikiro say
"uncle"...

But the
one being
tired out
is Tokura-
zaki-kun
instead..

But the one
being tired
out is Tokura-
zaki-kun
instead..

The plan
was to let
Isshikiro
wait to
crush him..

Tu
tu
tu
tu
tu

Just when will
I be able to
chase out
that plague!!

W...
why...

Why
is it
always
like
this...

„Ughhh!“

Like this,
before I
manage
to crush
him, I
might be
the one
to be
crushed
instead...

At this
rate, my
garments
will get
even
worse...

And...if
that
happens...

It
that's
WRONG
Sasael!

Because of that
plague my
stomach pain got
so bad that I
couldn't stay at
Maeu anymore...

That's
uncool—
Super
uncool—

How
late...

Himma,
so dad got
fired from
Maeu—

You come
along as
well.

Sasael! Mom's
divorcing him, so
I'm leaving now.

See you—
Bye-bye

No no
way—
Fuuuuee
uuu...

Kay
got
it—

Fuuuuee
uuu...

Kay...
got it...

Ahh
Sasae!

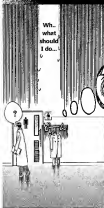

And eventually
with all
opposition
having
disappeared
Sasae will
marry Keosho...

But isn't it
just your
imagination?

Hm? Did
you just
hear
someone
calling your
name just
now?

Wh...
what
should
I do...

Oh, good
boy ♡

And then, my
grandchild
will be born,
looking
just like that
plague...

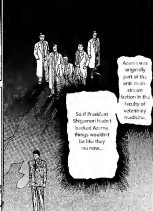

Heard?
Well it's
sounded.

It'll be fine if
Asama just
loses the
trust of his
supporters.
Ex-President
Shigemori!

I see
it's still
not too
late to
do that!

Asama was
originally
part of the
anti-mu-
stium
faction in the
faculty of
veterinary
medicine.

So if President
Shigemori hadn't
backed Asama,
things wouldn't
be like they
are now...

12

If Ex-President
Shigemori sees the
reforms Asama has
made, and becomes
disappointed in
them,

Then
Asama's
downfall
won't
just be
indefinite
anymore!

President
Asama! If
that's the case,
then I have a
suggestion!

Alright,
that's
it!

Even if
Ex-President
Shigemori is
retired, he still
holds a large
influence on the
university!!

14

On top of that, if the illness is squamous cell carcinoma or lupus erythematosus, and the patient can't be cured, then Ex-President Shigemori will inevitably harbor a sense of distrust towards him...

His outer appearance is like a typical punk, so if someone of Ex-President Shigemori's age sees him, there's no way he'd leave a good impression

And if after that, I implant in Ex-President Shigemori the idea that the physician Azama had hired is really terrible, then everything will be perfect!

Yes!
Nice to meet you,
Ex-President Shigemori!

How,
so you are
the one
called
Tesshou
baashiro-
kun!

Not that I mean to doubt Azama Jun, but is it really alright like this...?

How unexpected because he was the one that Azama Jun had hired, I was wondering what kind of man he'd be.

But he has quite a good appearance.

Exema

Heard

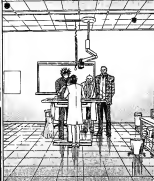

Well then I'll be leaving the rest to you gentlemen.

Ahh, please treat him well!

Then, let's start Doan's examination immediately—

Sign inspection (testing) room

Well,
that's
interesting.

Now that I
think of it,
the red marks
around his
mouth looked
a lot like the
marks on
Dr. President
Gegemon's
hands.

That's a
possibility
too!!

EUREKA!!

EUREKA!!

18

For now,
the
cause is
unknown.

I did a lot of
tests, but all the
results came out
negative.

How
were
the test
results...

Excuse
me.

But...there
was one thing
that was
bothering me...

What
illness is
that from?

The scene
on Gen-
President
Shigemori's
hands...

Yes...

...could
it be...

All times when
the cause is
unknown
for both
humans and
animals, it
often is...

Ah...ahhh,
this...the
truth is I'm
not really
sure either...

28

*Zoonotic infection - an illness that infects both humans and animals and can be caused by bacteria or parasites. They are capable of being transmitted between animals and humans.

I hope you enjoyed the chapter!

Ex-
President
Shigemori!

Could you
let me examine
your body?

At times when
the cause is
unknown for
both humans
and animals,
it often is a
zoonotic
infection!!

Chapter 106: Doctors and Veterinarians

This might
become an even
bigger
issue than
I expected!

Th...this
is great...!!

This is an
illness that
even a doctor
such as
myself
couldn't
understand
you know !!

D...do you
understand
what you
are saying?

If I can search for the common points between Ex-President Shigemori's and Dom's illnesses, then I might be able to find something!

But, Ex-President Shigemori didn't think that he had the same illness as Dom, right?

... ..

You mean that even if a doctor may be unable to understand it, it might be an illness that a veterinarian can understand ...

I see ...

Could you maybe let me take a look at the marks on your hands?

Not just the test results, but right now...

Um ...

If that's the case, then I'll ask my kouhai in the faculty of medicine to specially give you access to the medical records on my dermatitis.

Understood.

What is with
this man...?
Is he really
the veterinarian
that Azama-kun
had hired...?

very
well...

Then I will have
to take this
matter up with
Azama-kun as
well.

After having
injured my
pride as a
doctor to
this extent,
if he still
doesn't find
anything
after this...

If I want to mention
anything that stands out,
it'd be that although
the symptoms on his hands
are pretty bad, the part that
was covered by his sleeve
doesn't have any markings
at all...

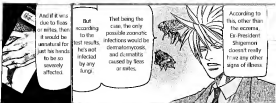

Just
looking at
it directly
won't
help me
understand
anything...

Hmm,
it's
obvious
but...

And if it was due to flies or mites, then it would be unusual for just his hands to be so severely affected.

But according to the test results, he's not infected by any fungi.

That being the case, the only possible zoonotic infections would be dermatomycosis, and dermatitis caused by flies or mites.

According to this, other than the eczema, Ex-President Shipemon doesn't really have any other signs of illness.

I really wish that I could help you more, but unfortunately I don't really think that this is a zoonotic disease...

But symptoms for that only occur in places where you get bitten or scratched, so it'd be different from this right?

And the zoonotic disease in which there are skin symptoms would be paratuberculosis,

I see...

Could it be...

.....

I guess that
Ex-President
Shigemori's
and Dom's
illnesses are
different
after all.

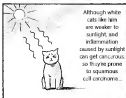

It's true
that the
symptoms
are similar
but...

Um...

It's definitely
not squamous
cell carcinoma...
or lymphoma thing...

Although white
cats like him
are weaker to
sunlight, and
inflammation
caused by sunlight
can get cancerous,
so they're prone
to squamous
cell carcinoma...

Well I guess it
makes sense that
I don't get
Ex-President
Shigemori's
illness because I'm
a veterinarian,
but...

If that's
the case,
then what
in the
world is
Dom's
illness?

Weak to
sunlight?

Hmm? Well a
sec...

I...I see!

Then like I thought,
Ex-President Shigemori's
and Dom's illnesses are
the same!!

Now that I
think about it,
Ex-President
Shigemori's
accident was
on his hands
and cheeks...
only places
where sunlight
would hit his
skin...

But...if it's
not a zoonotic
infection,
then just
what is the
cause...

There is one!
There's one
more thing that
affects both
humans and
animals...!!

I
know...!!

Gyapp-san,
could you
give me
the usual?

If I can recall,
just now
Dr. Honore
said that
they were
going to
Fujinaka
sushi...!!

Just what
do you need
suddenly
appearing
like that...

Fufu, that
night, keep
going...

the
President's
dinner-room

Just as I
thought
he really
is a man
lacking any
common
sense...

Well...
what?!

Don't
and the
President's
illness is
likely...

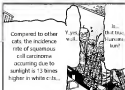

I figured
out the
identity
of the
illness!!

.....!!

Light hypersensitivity!

Compared to other cats, the incidence rate of squamous cell carcinoma accounting due to sunlight is 15 times higher in white cats...

Y-yes, well...

Is... that true Humans?

Ex-President Shigenobu's scar on his hands is only on the parts where light would hit it right?

White cats are much weaker to sunlight than other cats, see!

And Dom's a white cat!

13

Thanks for waiting!

Abalone udon??

Ex-President Stepmoose? Are there any foods that come to mind?

*Note: Wata = the internal organs

C...could it be!!

14

I'm cured...

3 weeks later...

After following Iwashiro-kun's instructions, I was completely...

End Nya~<3 All time-nyaa~<3

19

I'm extremely thankful to you...

See you later.

For both room-lad & President Shigetsugu.

That's great. I'm relieved.

Get...

Hm?

Dr. Iwashiro
Dr. Iwashiro please come
to examination room 2.

Platone
it wasn't
really...

Thank
you very
much.

...however...
this really is
an embarrassing
moment
for a doctor.

Okay

Ah

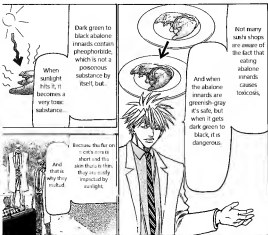

Ex-President
Shigemori, sorry
but I'll be gone
for a bit!

18

If things had
continued on like
that with the cause
unknown, just
what might have
happened to
Dom?

I had no idea
that eating obscene
inwards could
cause a toxiconis
resulting in light
hypersensitivity...

It can't be helped that Ex-President Shigemori was unaware of it.

.....

Well, even amongst veterinarians, not that many are aware of the fact that abalone innards can cause toxicosis.

So within the world of human doctors, the number that know are even less.

If Iwashiro-kun had not realized it, then it could have become quite severe.

So I had also overlooked it..

Actually, when Washiro-kun came to ask me for advice, I didn't think that a cat would be being fed such an expensive food such as abalone.

.....

But everything was all my fault...

I was happy when I saw Dom eating it so happily, because it was like he also had the same food as me...

And his passion that allowed him to unhesitatingly face me, like the President of the university...

His attentiveness in seeing the similarities between the eczema on my hands and the eczema around Dom's mouth, which even I, his owner, had overlooked...

That Iwashiro is quite impressive...

There really is more to a person than just their appearance...

There isn't a single man like that in the faculty of medicine.

He has
the
passion
to face
any
problems.

For him,
if it's to save
a life or cure
a disease, he
will not be
bound by
common
sense.

But,
that is
one of
his good
points.

Well, it's
true that
including
his outer
appearance,
he is a
completely
unconventional
veterinarian.

And I believe that
is exactly why
President Azama
had Iwashiro-kun
hired at Meiou
University as a
physician.

.....
!!

20

Heaven's fun!
Please continue
supporting
Azama-fun from
here on out!

It's great
that I made
him my
successor!!

22

Instead, now both
Azama and
Iwashiro have
please Ex-President
Shagemon!!

No way...this
is the exact
opposite of
what I wanted
to happen!

Y... yes
of
course...

Why is it
always like
THIS?

Wh...
why...

I hope you enjoyed the chapter!

Chapter 107: The factional wall

It would waste
our efforts to
avoid using
surgery to treat
the patient.

Chapter 107:

The factional wall

So what exactly do you want us to do Kyokasa-kun?

Only that if one of our hospitalized patients undergoes a sudden change, we would like you to not perform surgery, but to instead administer first aid treatment.

It's not much.

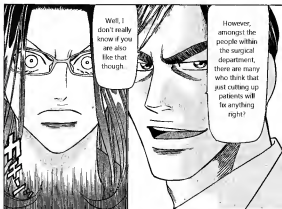

We properly draw up plans in order to treat patients.

Of course, we don't mind only administering first aid treatment.

But...

If they require surgery, we will request your side to perform it, so we don't want you to be doing so of your own accord.

Well then...

Ahh, I'll leave it to you.

Understood. In any case, from now on if any of the patients from internal medicine's first laboratory undergo any sudden changes, we'll only administer first aid treatment.

Dr. Kuroki!

Well, it's kind of like that...

It kinda seemed like Dr. Kyokawa hated the surgical department or something...

What was with that oddly prickly exchange just now...?

It's not something to be surprised about. In both the world of human doctors and the veterinary world, it's general knowledge that internal medicine and surgery have a bad relationship.

Within Meiou, there is a factional rivalry between the surgical department and internal medicine.

What did you say?

For example, there are cases of treatment being done too late for a patient due to turf wars between internal medicine and surgery...

Besides all that, there are actually a lot of problems arising...

Well, that fact in itself is pretty obvious, but Meiou also doesn't hold case review meetings.

And internal medicine can't just examine surgery's patients. You are aware of that right?

The right practice is being specially exempted from it, but normally surgery can't just go and examine internal medicine's patients.

[It's not really like this in reality.]

You know, in human medicine, internal medicine and surgery will hold meetings to talk about whether or not surgery is necessary for a case right? I'm talking about that.

Case review meetings...?

Well, other university veterinary hospitals also usually don't hold case review meetings either...

Even if there is a patient in internal medicine that needs to have a surgery done, the surgical department's vets won't be aware of that...

But, as long as the meetings don't occur, unless a vet from internal medicine voluntarily goes to ask the surgical department

So as a result,
it becomes
too late for
more and more
patients
requiring
surgery...

Then why doesn't
the President do
that case
review meeting
thingy?

Wh...
What's
with
that...?

So both the
consultation
with surgery,
and the
increasing of
the need for
surgery to
the owner are
done late.

On top of that, with
internal medicine
and the surgical
department having
conflicts in Mexico,
internal medicine
tends to depend on
the surgical
department.

Well,
but...

Depending on
which side the
patient goes to
first, the patient's
date will change
accordingly.

Right now,
Mexico's
internal medicine
and surgical depart-
ments are just like
separate hospitals.

It seems
like he tried
to have them
done, but
professors
from both
internal
medicine and
surgery
opposed it.

Within Meiro,
Professor Kyokawa
is an unusual guy
in internal medicine
who is actually
passionate about
treating patients...

The reason why
Professor Kyokawa
said all that just
now might not
only be because
of the factionalism...

*Note: In both human and animal medicine, the ultimate choice of treatment falls with the patient or the person responsible for the patient.

If an owner
strongly wishes
for a surgery to
be done, then he
has no choice but
to ask the surgical
department about
it right?

But, even so,
in the
end the
choice of
how to treat
the patient
lies with
the owners*,
so...

For small
animals such
as dogs and
cats, rather
than using
surgery,
which puts a
large burden
on their bodies,

He strongly
believes that
using medication
or certain diets,
and other various
methods from
internal medicine,
are the best way
to treat them...

And as
a result...

Eventually Professor Kyokawa began to say that "If the patients are taken by the surgical department, they will be killed."

There have been multiple cases where his patients have died during the surgeries...

Although I don't really like it either when he talks bad about surgery, it honestly is a deep-rooted problem...

Ah, boy.

I'll also be supervising the night practice tonight, so I'll see you later.

Well I have work, so I have to get going.

Within Nodou,
there are still a
lot of problems
that I don't know
about...

That, I
can't
forgive!!

But, for it to be
too late for patients
because of the
fight between
internal medicine
and surgery...

Isn't there something
I could do about
it...?

I see!
You
actually
quite
simple!

Are there
medical
equipment
that
can
be
used
in
this
case?

There
are
many
types
of
equipment
that
can
be
used
in
this
case.

He...

Since I'm supervising the night practice anyways, I just have to find the patients in internal medicine that need surgery during that time!

Alright! Then starting tonight, I'm gonna thoroughly check all of the hospitalized patients!

And then afterwards, all I need to do is go to the internal medicine doctor in charge of the patient and convince them so the surgery can be done before it's too late!

Sure!
It's no problem!

Then, I'll go see the owner to the door.

Well, with this things should settle down a bit...

It's nothing!

It's just a small thing that's happened.

For taking a look at my pet at this time of night...

Thank you very much for today!

That's right!

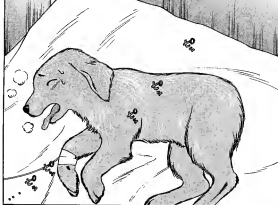

Size: House laboratory room

*Note: ICU = intensive care unit

Oh...

His name is Barney and he's currently 5 months old.

A male Irish setter.

And the name of his sickness is...

Hm? Dr. Kyokawa is taking care of this patient.

Why... why is he one of internal medicine's patients...?

That's impossible...

D...Dr.
Kurokill!

Look at
this for
a bit!

What's
wrong, for
you to be in
such a
hurry?

18

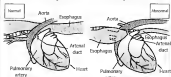

This is
PRAA...

If I can recall
properly, isn't
that an illness
that can only
be cured
through
surgery?

It's a
persistent
right aortic
arch isn't it!

Tsukasa Ryoute's One Point Explanation

Wow, Persistent right aortic arch is a congenital disease where the esophagus becomes pinned due to being under clod between the aorta, the internal duct and the pulmonary artery. Unless food is administered in the liquid form, I get thrown up. As a result, the internal becomes malnourished and the throw-up food may enter the lungs, causing death by pneumonia.

Wow, it sounds
like something
not do with the
throat!

So just why is it
that Dr. Kyokawa
looked at him,
yet has had him
hospitalized as
a patient of
internal medicine?

It's true...but
it's just like
that...

If it's done too late, even if you do the surgery, the esophagus won't be able to function properly again.

And if you don't do the surgery, the patient will only live for 1 year at most.

For a patient with PRAA that is already over 3 months old, it's better to have the surgery done as soon as possible.

This illness is also out of my area of research, so it could be possible that Professor Kyokawa has some particular reason that I don't know of.

There's no way that he doesn't know that.

But... Professor Kyokawa is one of the best doctors in internal medicine.

You can't do that.

Dr. Kuraki, I'm gonna go see Dr. Kyokawa right now and have him let me do the surgery.

I've never heard of any methods of treating PRAA without surgery!

But!

While it's true that the night practice is being treated specially, we're only allowed to touch patients that undergo sudden changes and administer first aid on them!

So if you go and make a diagnosis all your own accord and overturn the opinion of a professor in internal medicine, you'd be completely violating the rules!

It's not like this patient has undergone any sudden changes

Those of us in surgery can't just go and examine him by ourselves

In the end, this dog is still internal medicine's patient!

Mitsuki-san, you are also aware of the delicate relationship between internal medicine and surgery, correct?

Not only Professor Ryokumen, but all of the veterinarians in internal medicine won't keep quiet about it

If someone from surgery just goes and makes a diagnosis on one of internal medicine's patients

Isn't there anything we can do...?

Umm... but Dr. Kusaka — even I know that PITA can't be treated with anything but surgery.

You would, without a doubt, become unable to stay at Meiou anymore...

Even if Washiro-kun is in the right, he would have no choice but to dispose of you.

For President Anema, who wants to somehow make the case review meetings a reality, because he can't allow the relationship between internal medicine and surgery to get even worse,

It's true that this dog's tale might be pitiful.

But it would be wrong to run everything over this one thing!

I understand Washiro-kun's feelings, but if you get fired now, what will happen to all the other patients that only you can save?

Under-

Then I won't just go and make a diagnosis.

Fine.

I hope you enjoyed the chapter!

Chapter 108:

The time limit is 2 hours

Doing a surgery of your own would be way too ridiculous.

Even though it's against the rules for us from surgery to just go on make diagnoses for internal medicine's patients,

Wh... what are you saying...?

Intend on leaving Merou?

Or could it be that you...

Dr. Kuraki...

It's true that I want to save a lot of patients at Merou.

And that right now, getting fired from here would leave me in a bind.

But I don't want to ruin everything over this one thing.

Just now, you said that "It would be wrong to ruin everything over this one thing"...

But even so, the reasoning saying that it's okay to not save a patient right in front of me...

SAKURA 0004

That PRAA patient has to have a surgery as soon as possible.

Or else he definitely won't survive...

If the hospital's rules say that it isn't allow even with all that...

I don't get it at all!

When I'm...

Gonna go and contact the owner.

Then I have no choice but to do the surgery by myself!!

When should I do it?

.....

Just

.....

4

But, if he does the surgery without permission, then it likely won't be settled with just him being fired.

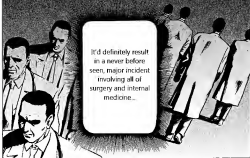

FIUU

Of course, I fully understand Heathers' feelings, and if I could, I'd also want to save that patient...

A wife that's better...

and I'm not sure if I can do it...

It'd definitely result
in a never before
seen, major incident
involving all of
surgery and internal
medicine...

But what
could I
do—

I have to
do some-
thing to
stop him
or else...

And it's
impossible that
an assistant
doctor who
would need
having it done
due to factors
between internal
medicine and
surgery.

It's common
sense for a
lot that IRMA
can't be cured
with anything
but surgery.

There should be
some proper
reason for why
Professor
Kiyosumi hasn't
had any surgery
done for that
patient.

If I can't even
through no sudden
changes have
occurred, it may be
possible that I
could be fired
over just that
but it's better than
having the surgery
done!

I'll ask
Professor
Kyonosue
directly, and
once Iashiro
has understood
the reason why
the surgery is
not being done,
I'm sure that
I'll be able to
stop him.

It's already
2 a.m., so he's
probably
already
asleep...

He's
not
asleep
yet...

Now that it's
gotten to this
point, it's either
sink or swim...

What
should
I do...

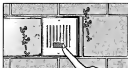

If Iwashiro-kun has to prepare for the PRAA surgery alone, then it will take at least 2 hours before the surgery will begin—!

There's no choice but to go to Professor Kyokawa's home.

Professor Kyokawa's home isn't that far from here, so as long as I return within 2 hours, I should be able to convince him to stop before he starts the surgery!

Wake up, Professor Kyokawa!

But there was something that I had to ask you urgently no matter what...

It's Kaede from surgery. I'm extremely sorry for coming so late at night.

At this time of night...

Just who is it?

I hope I can get him to tell me without having him realize what really is going on...

I doubt that he would think we would try to do surgery without permission, but...

The truth is, while I was doing rounds at the hospitalized patients, I found a patient that worried me...

I'm truly sorry Professor Ryusaku...

Do you have no common sense?

What in the world is this about?

It was a patient called Barney with PRAA, who you are currently supervising.

...a patient that worried you?

.....

Knowing that, I felt that I absolutely had to ask the professor why he hasn't had surgery performed for that patient.

PRAA requires surgery, and cannot be cured by any other means.

I fully understand that it was unacceptable of me to have gone and examined a patient from internal medicine that hasn't undergone any sudden changes.

In addition to having overlooked your opinion, but...

.....

That is why
I came to
your home,
even though
I was fully
aware of
how rude
my actions
were...

In order
to do the
surgery,
we must
hurry.

However, as I
am in the surgical
department, I
couldn't possibly
talk about this
with you in the
university, due
to your position
as a professor
in internal
medicine...

.....

But if it's for
a patient
she can
become this
hot-headed...

I'm surprised.
I've always
pegged
Kanda-kun to
be a more
cool-headed
woman.

This woman...
did she not
think that if
she did this,
she would be
punished?

Because right now in the
hospital, there's a
veterinarian that is planning
on doing the surgery all
on this own...

There's no
way I could
possibly
stay calm
right now.

They are pictures of all the patients that have died up until now.

No...

Are these... pictures of the patients that the professor has saved up until now?

.....

.....

When I properly explain the reason why, the owners are unexpectedly compliant with giving me a picture.

It's the patients that I couldn't save that I must remember.

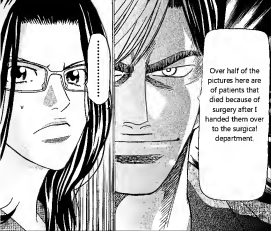

12

Incidentally...

There aren't many people that go this far in thinking of the patients...

Normally, people try their hardest to forget the patients that they couldn't save...

*Note: Circulatory system = a medical term referring to the heart and blood vessels

...eh?

Just think about it

That's impossible...

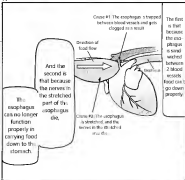

Because the surgery for PRAA isn't effective at all.

And there are 2 main causes.

14

Cause #1 The esophagus is trapped between blood vessels and gets clogged as a result

The first is that because the esophagus is sandwiched between 2 blood vessels food can't go down properly

And the second is that because the nerves in the stretched part of the esophagus die,

The esophagus can no longer function properly in carrying food down to the stomach.

Cause #2 The esophagus is stretched, and the nerves in the stretched area die.

PRAA, in other words, persistent right aortic arch is a disease in which a dog can't eat solid food eventually resulting in food entering the bronchus causing pneumonia, from which a patient will die from within 1 year after birth.

It can't be helped that nothing is done to fix it during the surgery, but if this stretched part is left alone, then the result is the same whether or not you do the surgery.

Because the esophagus is an organ that mustn't be cut and injured

So most of the time, pneumonia still occurs and they die within one year

Even if you do the surgery, the patient still can't eat solid food in the end

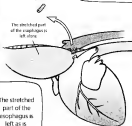

By cutting off part of the blood vessel, the esophagus can be released from the state of being sandwiched by blood vessels

The stretched part of the esophagus is left alone

The stretched part of the esophagus is left as is

That's why the risk of getting pneumonia doesn't disappear, and at the very least, I have never seen a PRAA patient that has undergone the surgery survive for more than one year.

However, the only thing that surgery can help fix is the state of the esophagus being sandwiched by blood vessels

So the chances of the stretched part of the esophagus healing are zero...

On top of that, in Barney's case, it's already too late

After about half a year, the stretched part of the esophagus will naturally heal to a certain extent but it will never completely heal

Then to me
such a
surgery is
only being
done for
the surgical
department's
self-satisfac-
tion!

But even if
the surgery
is done, if
both the
symptoms
and life
expectancy
remain
unchanged

Of course, if
we're talking
about treating
the disease
then it's not
wrong to say
that the surgery
will treat it...

Upon
hearing
the term
"PSMA",
you guys
from
surgery
automati-
cally think
of cutting
them up.

...I fully...
understand
Professor
Kykawa...

I deeply apologize for
causing you such an
inconvenience due to
my lack of study...

I will be doing
everything
that I can
using internal
medicine's
methods of
treatment

I have
absolutely
no intention
of handing
that patient
over to
surgery!

Truly
sorry...

But if this happens
again, I will
definitely
have you fired!

It's fine as
long as you
understand

Looking from
the owner's
and the patient's
position,
Professor
Kiyokawa's
decision was
correct...

At worst,
he could
be taken
to court
to be
sued!

The reason
is, for the
sake of the
hospital,
I cannot
allow him to
do such
things.

If he does the
surgery of his
own accord,
not only will he
be violating the
rules of the
hospital.

Must
Shawara
soon
quit.

If he hears
about this,
then even
Iwashiro-kun
definitely
wouldn't go
through with
doing the
surgery...

I have to
somewhere
stop
Iwashiro-
kun for
his own
good as
well...

So I should make
it before Iwashiro-kun
can start the surgery.

Luckily, it's
only been
about 1 hour
since I left
the hospital.

Senjimon
kurai

Oh, Dr.
Kurouki

Just where in
the world did
you go?
Because you
suddenly
disappeared, I
was worried—

I want to go
see Professor
Kyokawa...!

Thank
goodness—
as I thought,
they're still
in the middle
of preparing
for the
surgery.

Professor
Kyokawa's
decision was
correct...

Most PRAA surgeries don't actually help at all, and on top of that, it's already too late for that patient, so he definitely can't be cured!

You shouldn't do the surgery on that patient!

And up until now, all the PRAA patients that I performed surgery on all RED got better...

That's the first time I've heard of something like that...

That's weird...

And actually...

I can't imagine that what Professor Kyotawa said was wrong...

No way... are you sure about that?

That surgery
had already
ended a
while ago!!

But it's alright!
It was completely
a huge success!!
Incidentally, right
now we're preparing
for an emergency
patient that'll be
coming soon!

I hope you enjoyed the chapter!

Chapter 109:

A single life

Ahh, I see that...

There's no way you could have finished the surgery by yourself! This quickly!

Did you even do the pre-operative examination properly?!

That's impossible...

Right, Mitsu-san!

And for the surgery, Mitsu-san also helped out so it went super smoothly!

Dr. Kiyokawa already did all the required examinations!

Here your diagrams, and do all both blood tests and urine tests over there!

I'm very sorry, Dr. Kuroki...

No way...

On top of that, Iwashiro-kun was surprisingly quick at doing the surgery, so it finished in no time at all.

The owner also wasn't home just now.

And I couldn't just let the patient be put in danger by not helping out either.

I figured that it would be pointless to try and stop Iwashiro-kun.

So, what do you plan on doing now, Iwashiro-kun...?

You're definitely going to be fired...

I guess...

This... is the worst.

I completely miscalculated...

There's no way that President Azuma, who's trying to restore the relationship between internal medicine and surgery in order to have the case review meetings approved, will forgive this...

Anyhow, I have no choice now but to give up...

Who is it? At this time...

It just what this hell is happening...? Who is it this time?

It's even possible to Karotenhus with...

It's Toshiro leeching from surgery!!

About that PSA patient...

I came because I had something to report to Dr. Ryokan!

How many times do you intend to wake me up before you're satisfied?

Just what are you people from surgery thinking?

.....

EH...

EHHHH
HHHHH
HHHHH
HHHHH
HHHHH
HHHHH
HHHHH?

I went
ahead and
did the
surgery on
him!

I did the
surgery on
that Barney!

Wh...
what
do you
mean...?

A huge
success.

The
result
was...

Wh... what is this man...

I don't understand what he's saying at all...

I know that it was against the rules

But I don't get why I'd be fined for saving a life!

Don't joke around.

You... really did the surgery of your own accord?

But you also did a pointless surgery and pointlessly injured the patient?

What you did wasn't just breaking the rules of the hospital.

Can't be healed...? The stretched esophagus...?

It was already too late for that patient's PRAA, and even if you did the surgery, the stretched esophagus can never be healed!

If it's about the stretched esophagus, then I did properly fix it.

It's impossible for it to suddenly be fixed!

Even in patients with mild symptoms, a stretched esophagus is something that takes at least half a year to heal you know?

What are you saying?

Oh...

Is there or what, man, huh?

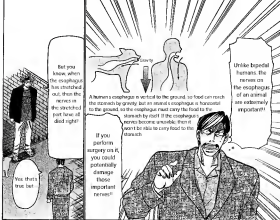

Because the esophagus is an organ that must never be injured, you couldn't have possibly cut it up to fix it. There has to be a limit to what idiotic things you can say...

I cut the esophagus you know?

But you know, when the esophagus has stretched out, then the nerves in the stretched part have all died right?

Yes, that's true, but—

If you perform surgery on it, you could potentially damage those important nerves!!

Unlike bipedal humans, the nerves on the esophagus of an animal are extremely important!!

A human's esophagus is vertical to the ground, so food can reach the stomach by gravity, but an animal's esophagus is horizontal to the ground, so the esophagus must carry the food to the stomach by itself. If the esophagus's nerves become unusable, then it won't be able to carry food to the stomach.

This dead part is unneeded.

You know, like this.

If they're already dead then, isn't it alright to just cut that part off?

What did he say?

Who...

It's... impossible...!

Even if what he's saying is true, that surgery...

Simply put should be too difficult technically for a roadside surgical department yet like him to do.

In Barney's case, since it was too late for him, then he shouldn't be able to eat normally for life.

No way...based on the surgical method I know of, the patient should only be able to eat food after half a year if they're lucky...

But... why...?

THE PRESIDENT

It's obvious that if you did it, you would definitely get fired!

Why did you do the surgery...

Sorry, but I can't believe you with just that.

I'll have to file a complaint to the president tomorrow about this issue.

Something like
that should
be obvious.

...It's so
that I could
save even
more
patients!

For what
reason
did you
come to
Mexico..?

It can't
possibly
have been
to come
get fired
so easily.

**Because if
you can't
save each and
every life,
one by one,
then you'll
never be
able to save
many lives**

That's
why it'll
be a
problem
if I'm
fired.

And it's
also why
I'll never
abandon
a single
patient!

14

I again...
let another
one die...

About
you
guys—

I won't
forget...

Seen you
guys was—

Because
the one
who
couldn't

Me...

What that
guy just
said is the
exact same
as what I
believe.

Because if
you can't
save each and
every life,
one by one,
then you'll
never be
able to save
many lives.

That's the
first time I've
seen a real
fight against
the rules...

And that's exactly
why he did all
this against
the rules...

18

...Is that
really
okay?

If I tell President
Azama about the
events this time,
then that man will,
without a doubt,
disappear from
Meiou University...

It's hard to
believe it as
suddenly, but
if the surgical
method that
man spoke of
is correct...

And the
patient
truly is
cured,
then...

You this
is Meizu
University

Go
also

That if within
1 week that
patient really
does recover—

Could
you tell
Iwashiro
when he
gets back?

Ahh, are
you, the
resident on
night
watch?

17

1
week
later...

I will make it so
that this time's
surgery occurred
because I
requested it of
Iwashiro...

...all
it was
that

Isn't that
great!
You're
alright
now—

18

To think that
there was a
surgical
method like
this...

I can't
believe
it...

Well, it can't
really be helped
that Dr. Kuraki
whose specialty
lies in the
circulatory system
wouldn't know
of it

What
this man
said was
all true.

In addition because the difficulty level of this surgery is high, there are only a few veterinarians within all of Japan that are capable of performing it.

It has only recently been proved that the excision of the stretched part of the esophagus is actually an effective treatment.

It's natural that surgical techniques are constantly progressing.

And the same also applies to internal medicine's techniques as well.

Well, to Washiro-kun, it's something that he learned while training in R.I.D., so for him it's the naturally correct method of doing things.

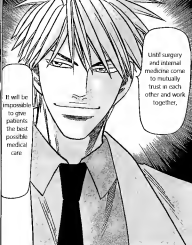

This is exactly why it's necessary for both surgery and internal medicine to talk using the case review meetings.

.....

first
body

It will be impossible
to give
patients
the best
possible
medical
care

Until surgery
and internal
medicine come
to mutually
trust in each
other and work
together,

20

.....

harder
than

If
Iwashiro
had
consulted
me prior
to doing
the
surgery,
just because
he was part
of the
"surgical
department",
I wouldn't
have trusted
him at all,
and would
have let this
dog die...

21

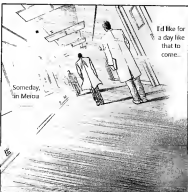

Vets that
are capable
of putting
everything
on the line
in order
to save a
single life...

...Come
review
meetings
...huh...

See
you

Someday,
in Meira

I'd like for
a day like
that to
come...

If all the
guys in
surgery
were like
that, then
I would
want to
immedi-
ately have it
approved

I hope you enjoyed the chapter!

Aga
Uramatsu
pyon

Misou has
reminded
us to
moderate
our
actions

It's sudden
but I am a
third year
in Misou
University's
veterinary
medicine
program...

Chapter 110: A live door

Like today,
was pouring
rain since
morning...

That
day...

Today, I'd like
to talk about a
kinda scary story
that happened
to me a few
months ago
within Misou
pyon.

Because it's
full of
hard-headed
people they
have no idea
how to make
use of all the
equipment!

Even though
they say that
Meiou has all
the latest
technology
in the end it's
still a university.

So they
should
just have
online
classes
on a rainy
day like this.

Nowadays,
there's
internet,

Because
that way,
home
medical
care would
become
possible...

This person
is my
classmate,
Emon
Hori-kun...

If I were in
charge of
Meiou, I would
utilize the
internet
more, and give
birth to a great
synergy...!

*Synergy = home medical care

When it comes down to it, all he says is that he wants to control everything to make a great "synergy"-pyon.

That's why I have to control it and make that synergy.

He's a very interesting person, and I don't think that what he says is wrong, but...

Professor Ryosaku?

Aren't you interested in Professor Ryosaku?

No, no, by the way Aya-pyon!

What is it, pyon?

I'm sure that they're completely different from the professors at Moscow with their ancient minds.

Speaking of R.E.D., it's rumored that there are tons of super talented v...talentings gathered there!

Yeah, he's that teacher that came from the famous R.E.D., and it seems that starting next year in April, he'll be opening up a Wildlife laboratory.

Not only that, but
Professor Ryouto is
rumored to be
SUPER HANDSOME
you know?

Oh, super
handsome?!

Hmm...

But unlike Hen-kun
I'm not really a
person with such
a futuristic mindset...

Alright,
let's go!

Then, shall we go right
now to meet Professor
Ryouto and talk to
him about the Wildlife
laboratory?
*Of course it's obvious, yes
anobou*

At that time,
I was simply
curious pyon...

You
don't
t
want
inter-
esting?

You
pyon!

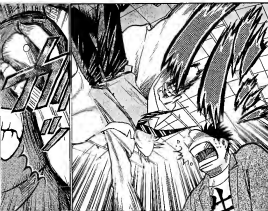

So I think it would
be a great way
to kill time pyon...

It'll
get
to
must
a
super
handsome
professor!

Outside
was
raining,
so I
didn't
feel like
going
anywhere

So, what business did you two have with me?

Shoot?!

N...not only that...but we've been completely locked in!
A padlock?

Well, take it easy and stay for a while.
It's raining outside anyhow.

In other words, you two are students that came to ask about my Wildlife laboratory that will be opening up in April because you were curious about it...

...I see...

Now,
sorry
about
that.

That...

It's
like
that,
right?

Rather, the book
that you just called
a research book
is clearly an
erotica magi-
pyon.

No, you
definitely
were
sleeping
just now,
right?

You know, I
have a habit of
getting too
concentrated in
reading these
sorts of
research books,
so I lose sight
of everything
around me.

So I just
kind of
reluctantly
attacked
you.

Why is the
one who did
the wrong
passing it all
off so easily...

It's all
water under
the bridge.

Well it's alright,
in the end
we're both
human, so
we'll make
some mistakes.

Small SPKs: Whisper whisper

81

12

Mind you it's true that even at R.E.D. I'd be able to save a great number of wildlife and patients.

How ever...

Mind you, at R.E.D. I had already used up all of my paid vacations.

How ever...

I wanted to save a greater number of patients!

I wanted more paid vacations!

If I switch my workplace to Meioa, then just by doing that, my number of paid vacations will increase, correct?

Then I'd be able to save a greater number of precious lives compared to what I could save alone, had I continued working there, correct?

If I teach about my built-up experiences and know-how from up until now, and train students...

In order to give rise to an even greater synergy right?

Came to a giant university organization such as Meioa University to teach

In other words, the professor, as a person who has gained experience at a special place such as R.E.D.,

I see!

Rather than synergy, it's more like living luxuriously!

Well, something like that.

How about you become one too, Aki-pyon?

For example, this "Wildlife research and clinical care" seems like it would be very helpful to study!

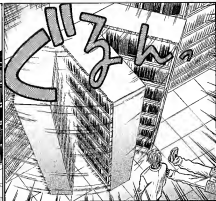

Sorry, but it's not something that I can just let people look at as easily.

Because the true contents are more important research materials.

With this, it'll be fine.

17

I suppose that I have no choice but to use this.

All that remains is to deal with the mess...

The book side contains the real books, so with this, everything's okay!

It seems that
he suddenly
felt better,
so he just
went home.

Ahh,
that
boy.

Don't
just ask
what's
wrong!

I heard
that a
student
fainted?

Yeah,
Hori-
kawa.

Uh?

Y-
yeah.

Then
that's a
relief!

Yep, but it's not
like he was in
perfect condition,
so I told him to
rest properly at
home.

Is
that
so?

I
guess
so.

If you're
worried,
then why
don't you
call him
on his
cellphone
later?

After that,
he dropped
out of
Mexico
University...

That is
within the
expected
range

And in just
a few
months, he
created a
certain
enormous
IT company
and suddenly
became a
famous
person, but

But ever since
then, for some
reasons (only
from my cell
phone were
blocked) and
I was unable
to contact
Hironobu

Exactly what
happened on
that day, still
remains a
mystery.

It's a scary story, isn't it...

I hope you enjoyed the chapter!

Chapter 111:

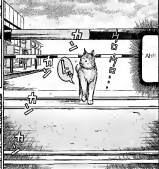

A new physician

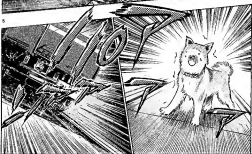

●おまけ●

とある週めボツネーム ※(動物やの苗字みたいなもの)
 どうつなげていくつもりだったんだろうな…
 しかし字汚いな自分。

Pleasure to meet you.

Takumi Yahiro-kun.

He is Meiou's newest physician, **Takumi Yahiro-kun.**

I see, so he was a vet ...

Ah, with nice to meet you...

And I finally found one ...

Truthfully, I've been thinking for a while now that we needed another physician, so I was looking for some good talent.

You know if you think about, you really will do it!

There are many...

Ever since you came to Meiou you still haven't taken a single day off to rest.

After all, even though Karaki-kun coming in to help with the night practice has somewhat decreased your workload.

Yahiro was originally working at America's **Oxford Medical Center**, but he came back to Japan.

In order to help out with Meiou's night practice.

And I'd also like you to properly rest

In exchange, on the weeks when you don't have night practice, you'll have to do more supervision of the clinic and wildlife treatment.

Thank you very much for this opportunity, President Azuma

That's why from now on, I want to have you and Yuhito do alternating weeks of night practice

As a veterinarian, there is no greater honor than to be able to take up the role and even be able to save the lives of patients in the process.

In this time where many of Japan's university veterinary hospitals neglect to provide a night practice, the fact that Mabo University is taking this task to improve this situation is truly significant.

Ahh, coming here...

Let's both do our best and work hard! Issuuuu-kun

I'm
kinda
happy!

That's
great

It seems like
a really
amazing
guy has
come to
Moriah...

And by the way,
Yahiro is also
considered to be
on the same level
as an assistant,
so please pass on
the word to Heiwami.

Yahiro will also, like
Iwashiro, belong
to the surgical
department's first
laboratory. I'd like
to have him start
in the clinic
immediately, so
please show him
the way.

Heiwami

Ever since I
watched
President
Azama walking
together with
Gento Shiryou
that one time...

Something
bugs me
about
that man...

There is
definitely
some
kind of
hidden
message
to it.

But if I didn't
mistaken what I
saw, then President
Azama's bringing of
Toshou-kun and that
Yakuro guy into Meiou
University —

I've tried searching
through President
Azama's various
connections, but so
far I haven't found
proof of any ties
to Shiryou.

Is Ryoma
about the
same matter?

In any case,
I'll have to
thoroughly
investigate.

On top of that,
if I remember
correctly, One-
Bridge Animal
Medical Center

is —

That
that's it
for me...

Yeah.

But, this
hospital
is...
pretty
nostal-
gic...

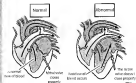

*Note: Cavalier - a breed of dog

Not only that but based on the symptoms the surgery must be done as soon as possible or they can't be saved.

All 3 of them have mitral regurgitation.

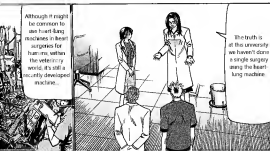

-Mitral Regurgitation-

A disease in which, because the mitral valve in the heart doesn't close properly the backflow of blood occurs. If the symptoms advance, water may accumulate in the lungs, potentially resulting in dyspnea, arrhythmias, or heart failure resulting in death.

Meaning that we have to use a heart-lung machine, and do 3 major surgeries at once right?

10

Although it might be common to use heart-lung machines in heart surgeries for humans, within the veterinary world, it's still a recently developed machine...

The truth is at this university we haven't done a single surgery using the heart-lung machine.

This field of study is currently being studied at Totto University, so just why in the world did the vet that referred him to Meiou not refer him to Totto instead...

The machine itself has only recently been brought into Meiou but amongst the veterinarians here, there still isn't anyone who can use it.

You know...

really...

If it's about surgeries using the heart-lung machine, I've successfully performed multiple surgeries at R.C.D. using it.

Shall I help out?

But having only one experienced person doing the surgery is still pretty high risk after all...

I have successfully performed surgeries using the heart-lung machine over 100 times.

Amazing... as expected of a vet scouted by President Azuma...

Both Iwatsubo-kun and this Teikyo-kun are both really amazing...

So it's definitely weird that they introduced the center to Meow instead...

Any hospital should be aware of the fact that Teikyo has progressed farther in using the heart-lung machine than Meow has...

But it, then, lets us consult Mr. Horowitz about the surgery.

But, this is kind of strange...

It's as if the veterinarian that referred them to Meiou predicted that we would have a veterinarian capable of using the heart-lung machine coming.

eh? I
don't really
mind but...

...then
I'll go
right
now...
Deluxe
the

Could I
talk with the
owner for a
bit?

Actually
rather than
the surgery
there is
something that
a bothering me
about the
patients...

Um, Dr.
Kurako...

It's as I
thought.

I just heard
from the owner!

Sorry
for making
you wait.

Illnesses caused
by the 3-way
cooperation
between a wicked
pet shop, a wicked
breeder, and a
wicked
veterinarian!!

Model breeder—a job where you breed dogs and cats, then sell the puppies and kittens to pet shops

Wh... what
did you
say!?

eh?!

28

In the case of
canine, mitral
regurgitation
is a genetic
disorder
present from
birth!

Which
may hold
true for
other dog
breeds
but...

First of all, the
owner was told at
the previous hospital
that mitral regurgitation
is an acquired disease
due to the process
of aging.

The reason for the lie is likely because they had received money from the pet shop to hide the genetic disorder, which is the shop's responsibility.

The previous hospital was one that was introduced by the pet shop where the cassettes were purchased.

Note: This sort of thing often happens in reality.

In other words, the veterinarian at the previous hospital lied to the owner!!

For 3 dogs unrelated by blood to have the same genetic disorder means that

The breeding environment of the breeder behind the pet shop is the cause of it all.

Incidentally, does everyone...

.....

She...
Shiryou...?

What
about
him?

I've only
heard of the
name, but...

Know of the
man called
Gento
Shiryou?

Abbreviated
as SIPS...

The name of
the pet shop
that sold the
cavaliers is...

22

!?

In other
words,
Shiryou
International
Pet Seller!!

It's a pet
shop under
that infamous
Gento Shiryou!

If I remember correctly, it's a hospital that has ties with Shiryō...

On Bridge Animal Medical Center...

Alright, I've succeeded in hacking the main server...

33

EH?

I believe his first name was Takumi.

In English, it should be written as Takumi (TM) Ltd.

All that's left is to see if there's any information regarding that man.

Wh...what is this...?!

Takumi Shiryō...?

Takumi Shiryō

I hope you enjoyed the chapter!

Editor's Note: Chapters 111-113 were written prior to the animal law amendment established on June 15th in 2005. While there are cases of irresponsible businesses upon which this story is based, not all pet shops, breeders, or designated veterinarians do this sort of thing. Only a small portion of businesses have such immoral practices. Due to the animal law amendment, pet-related businesses must be registered, and the government has the ability to give out business suspension orders. The fine for animal abuse can range from 100,000 yen to 500,000 yen.

Chapter 112:

The truth of the wicked pet businesses

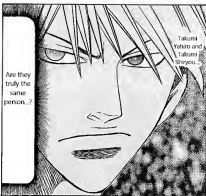

"Currently, the number of published research papers he has written exceeds 200..."

Considering that Karachai Jun, who is around the same age as him, has about 5 publications, then this is undeniably the caliber of a genius.

"Takumi Shiryou... at just 19 years of age, he received a PhD in veterinary medicine in America..."

Are they truly the same person...?

Takumi Yohiro and Takumi Shiryou...

This hospital doesn't have any records of the person called "Takumi Yohiro".

Takumi Shiryou
Name: Takumi Shiryou
Age: 19
Date of Birth: 1998.10.10
Address: 1-1-1, 1-chome, 1-chome, 1-chome
Occupation: Student
Blood Type: A
Height: 175cm
Weight: 65kg
Medical History: None
Emergency Contact: None

外科学
第一研究室

It really
is a
sickening
story...

Although, even
without Gento
Shiryou's shop
being around, it's
something that
happens frequently
in Japan...

Not only that,
but the illness
was caused by the
combination of
a wicked pet
shop, a wicked
breeder, and a
wicked
veterinarian...?

A pet
shop
under the
Shiryou...?

Is...that
true...?

In Japan, it's
normal to have
dogs and cats
being sold to
be showcased
within cages in
a shop window
right?

It's sad, but
Japan is
currently an
under-
developed
country with
regards to
animal welfare
laws...

*Note: Trimmer – a hairdresser for cats and dogs

If they contact the pet shop or animal lover clubs, then they can get introduced to many different homes where puppies or kittens may be born.

They get them from the home where the puppies and kittens are born.

And the receiving side also gains a sense of responsibility.

They won't give them away to people who seem irresponsible.

But because they are giving away a pet that they've come to love,

Of course, there are some owners that receive money when giving out the puppies or kittens,

That way, it benefits both the animals and human society as a whole.

As a result, there aren't many abandoned dogs or cats, and...

So usually when they find congenital diseases for which the pet shop and breeder would be responsible for, they hide it.

In those cases, the veterinarian receives money from the pet shop.

Ones that say that if you happen to find a congenital disease, you can come back in and exchange it for another puppy or kitten.

Other pet shops that you should be wary of include...

RETAILER

NEED

7

If you want a "refund" instead of an "exchange"

In pet shops that say those sorts of things, you have to confirm with the shop what will happen

Not at all.

But doesn't that seem reasonable...

SO WHAT
THEY
REALLY
WANT
FROM THE
PET SHOP
IS A
"REFUND"

IN PRACTICE,
OWNERS THAT
HAVE BECOME
CLOSE TO A
PET BECOME
ATTACHED TO
IT, AND NEVER
REALLY THINK
OF TAKING IT
FOR AN
"EXCHANGE".

BECAUSE
PET SHOPS
THAT OFFER
AN "EXCHANGE",
OFTEN USE
THAT AS AN
EXCUSE TO
NEVER HAVE
TO GIVE OUT
ANY "REFUNDS".

BUT...IN THE END,
THEY ARE TOLD
THAT AN
"EXCHANGE"
IS FINE, BUT A
"REFUND" CAN'T
BE DONE.

AND ARE
IN TURN
FORCED
TO ACCEPT
THAT.

I'VE ALSO
HEARD A LOT
OF STORIES
ABOUT THOSE
KINDS OF PET
SHOPS AND
BREEDERS.

IT'S
TRUE.

TO THINK
THAT SOME-
THINGS
LIKE THAT
WAS HAPPEN-
ING.

A
SMALL
FEELING
IT

AND BECAUSE OF THAT, PURRERS WITH CONGENITAL ABNORMALITIES ARE BEING BORN ONE AFTER THE OTHER...

ON TOP OF MAKING THE PARENT DOGS BREED IN A POOR ENVIRONMENT, THE BREEDER ALSO MAKES IT CONSTANTLY BORN BOTH TO ONE LITTER AFTER ANOTHER,

IN THE MEANTIME, AMONGST THE BREEDING OPERATIONS, THE MARKET OF THESE DOGS USED TO BE USED TO BEING A STRICTLY LEGAL ONE. HOWEVER, BECAUSE OF THE POOR QUALITY OF THE BREEDING, THE MARKET WILL BECOME TO BECOME, AND BEING WITH MORE CONGENITAL ABNORMALITIES.

WELL, THE CONGENITAL DEFECTS WITHIN THE 3 CAVALRIES IN THIS CASE,

IS PROBABLY ONE OF THE MOST TYPICAL EXAMPLES.

THIS IS ALL DONE IN ORDER TO DECREASE THE COSTS AS MUCH AS POSSIBLE, WHILE INCREASING THE PROFIT!

SO THAT THEY CAN HAPPEN...

BECAUSE THEY ARE...

IT'S NO WONDER THAT SOMETHING HAPPENED, CONSIDERING THAT IN THIS TIME'S CASE, BOTH THE PET SHOP AND BREEDER ARE LIKELY UNDER SHIROYU'S CONTROL...

IT'S ABSOLUTELY UNFORGEABLE...!!

THAT WAY, THERE
WILL BE AN ON-
SITE INSPECTION
OF THE SUSPECT
THAT RAN THESE
CAVALIERS WITH
THE CONFIDENTIAL
DISEASE.

LET'S
REPORT
THIS TO
THE
HEALTH
CENTRE
IMMEDI-
ATELY.

DO
NOT
ONLY...

BUT FIRST, WE
HAVE TO GO
DO THE
SUSPECT FOR
THOSE DATA.

STAND

RIGHT, AND
THERE'S ONE
THING THAT I'D
LIKE TO ASK
TWASHPO-
KUN...

UNDER-
STOOD

IF YOU'VE
SUCCESSFULLY
USED THE HEART-
LUNG MACHINE IN
MULTIPLE SUSPECTS
AT P.E.O., THEN
NATURALLY
PROFESSOR
DYOUTO HAS ALSO
DONE THE SAME
RIGHT?

THE
HEART-
LUNG
MACHINE

Advancing
Pain relief
Sensory
Control...

MEIYU

YOSHIO-KUN
AND TWASHPO-
KUN, COULD
YOU TWO SO
TALK TO THE
CENTRE AND
BEGIN THE
SUSPECT PREPARATIONS?

I WILL BE
CONTACTING
MR. HENAMI
TO RECEIVE
APPROVAL
TO DO THE
SUSPECTS.

AND IT'D
ALSO BE
GETTING IF
WE HAD
ANOTHER
JET THAT IS
FAMILIAR WITH
USING THE
HEART-LUNG
MACHINE.

THOUGH IT'S
UNUSUAL FOR
THE WILDLIFE
LABORATORY'S
PROFESSOR
DYCUTO TO BE
HELPING OUT
WITH THE CLINICAL
CARE, THIS
TIME WE HAVE 3
PATIENTS.

THEN TO
LIKE TO HAVE
PROFESSOR
DYCUTO
SPECIALLY
HELP US OUT
FOR THIS.

I'LL GO TO
ASK HIM
PERSONALLY.

DON'T WORN
WE SHOULD
TRY TO
FOR THE
HAPPINESS

WE'LL
UNDER-
STAND
PERSON-
ALLY

IF THE PEOPLE
FROM THE
MEDICAL CENTRE
DO AN ON-SITE
INSPECTION OF
SHINOBU'S
BEDROOM, WILL
THEY BE ABLE TO
DO SOMETHING
ABOUT ALL
THIS?

HEY
THANK

IT'S A
P.S.M. BUT
IT CAN'T
BE HELPED

WATER
BOTTLE

IF IT'S
LIKE THAT,
THEN I'LL
HELP OUT.

I SEE.

COULD IT BE
THAT THEY
WERE ALL BRED
IN THE SAME
BREEDING
LOCATION?

FOR A SINGLE
OWNED TO BE
BORN IN
3 COUNTRIES WITH
THE SAME
CONGENITAL
ABNORMALITY...

BUT THAT
REALLY
DOES
SEEM
AS A BIT

YES...IT'S
AS YOU SAY.

NOT ONLY
THAT, BUT
THEY WERE
BRED FROM
WHICH
THEY WERE
ALSO BRED

THE TRUTH IS
THAT YAHIRO-KUN
ALSO HAD THE
SAME, AND ALSO
CONFERRED IT
WITH THE OWNED

ANYHOW, I WAS THINKING OF REPORTING THIS MATTER TO THE HEALTH CENTRE.

AND TO IMAGINE THAT AN INSPECTION WILL BE DONE SOON...

.....

A STORE UNDER THE CONTROL OF THE INFAMOUS SENTO SHIRYOLL..

YES, THAT'S ALL THE CASE BUT IS THERE SOMETHING?

AND, HAS DAISHI-KUN BEEN MADE AWARE OF ALL THIS?

OR KUROKI.. I'D JUST LIKE TO CONFIRM THIS, BUT WAS THE FIRST PERSON TO MENTION ALL OF THIS YAMATO-KUN?

..NO...IT'S NOTHING.

UNDERSTOOD. THEN PLEASE EXCUSE ME.

IN ANY CASE, I'LL LEAVE THE PREPARATIONS FOR THE SURVEY UP TO YOU.

IF YABO IS
ONE OF SHIRYOU'S
PEOPLE, THEN
WHY WOULD HE
SAY THINGS
ACCUSING THE
PET SHOP AND
SPEEDER UNDER
SHIRYOU'S
CONTROL?

JUST WHAT DOES
THAT ALL MEAN?

.....

AND AS LONG
AS TESHOU-
KUN KNOWS
ABOUT IT, WHO
KNOWS WHAT
HE'LL DO FROM
NOW ON.

WELL, SOONER
OR LATER,
THE RESULTS
OF THE HEALTH
CENTRE'S ON-
SITE INVESTI-
GATION WILL COME
IN.

JUST
WHO IS
HE...?

COULD
IT BE
THAT
HE IS
ACTU-
ALLY NOT
ONE OF
SHIRYOU'S
CONSPIR-
ACIES?

18 OFX GEN.

WHY?!

IN THE END, THE BREEDER WILL ONLY BE FINED 300,000 YEN*.

IT SEEMS THAT THEY DID CONFIRM THE POOR BREEDING ENVIRONMENT AT THE BREEDER'S, SO THE PEOPLE AT THE HEALTH CENTRE DEPOSITED THE VIOLATION OF THE ANIMAL RIGHTS LAW TO THE POLICE, BUT...

WELL... I GUESS EVEN AFTER THE ON-SITE INSPECTION, NOT MUCH WILL CHANGE.

*NOTE: ABOUT \$3000.

BUT IN THE END, THEY NEVER CHANGED THEIR WAY OF DOING THINGS.

IN TRUTH, IT SEEMS THAT BREEDERS HAD MULTIPLE ON-SITE INSPECTIONS DONE PREVIOUSLY...

COMPARED TO THE PROFITS REaped FROM THE POOR BREEDING ENVIRONMENT, 300,000 YEN IS CHEAP.

THE CHANCES OF THEM AMENDING THEIR POOR BREEDING PRACTICES IN THE FUTURE IS ZERO.

!!!

IT'S BECAUSE
IN JAPAN,
THERE IS NO
LICENSING
SYSTEM FOR
PET SHOPS AND
BREEDERS.

IN THE WEST,
THERE'S A LICENSING
SYSTEM SO THAT
IF A PET SHOP OR
BREEDER IS DOING
UNMORAL PRACTICES,
THEY CAN JUST
YANK THEIR LICENSE
AND SUSPEND THEIR
BUSINESS.

WHY
IS IT
LIKE
THAT?

BUT
WHY?

THEY CAN
JUST IGNORE
THEM AND
CARRY ON
DOING
BUSINESS
AS USUAL.

THE MUNICIPAL
GOVERNMENTS
AND HEALTH
CENTRE CAN,
FOR THE TIME
BEING, SEND OUT
ORDERS FOR
IMPROVEMENT
TO THE WICKED
PET SHOPS AND
BREEDERS, BUT...

SINCE THE ANIMALS
OWNED BY THE PET
SHOPS AND BREEDERS
ARE CONSIDERED TO
BE THEIR OWN
POSSESSIONS, THE
GOVERNMENT AND
HEALTH CENTRE CAN'T
REALLY FORCEFULLY
CONFISCATE THE
ANIMALS EITHER.

AND
NO-
BODY
CAN
STOP
THEM
FROM
DOING
SO.

BUT IN JAPAN,
IT'S JUST A
REGISTRATION
SYSTEM, SO AS
LONG AS YOU
REGISTER,
ANYONE CAN
START A PET
SHOP OR
BECOME
A BREEDER.

I CAN'T
STAND
THAT!!

ARE YOU
SAYING
THAT WE
HAVE NO
CHOICE
BUT TO
BACK
DOWN??

DON'T
FORGIVE
YOURSELF...

WANTED
TO
TALK

I UNDERSTAND
YOUR FEELINGS
TESSHOH, BUT
IT CAN'T BE
HELPED...

THERE'S
NOTHING
THAT WE
CAN DO
ANYMORE...

I ALSO
CAN'T
STAND IT,
AND IF
THERE
WAS
SOME-
THING
I COULD
DO, I
WOULD
WANT TO
DO IT

BUT AS
LONG AS
THE LAW
DISCER-
NIZES THE
ANIMALS
AS THE
POSSIBLE'S
POSSIBILITIES...

THEN I'LL
JUST GO
TO BREAK
THEM OUT
MYSELF!!

IT'S
NOT
YOUR
JOB

THOSE
KINDS OF
GUYS
HAVE NO
RIGHT TO
BE IN
CUSTODY
OF THE
LIVES OF
OTHERS!

IT HAS
NOTHING
TO DO
WITH
HOW THE
LAW
RECOG-
NIZES
THEM ..

.....

BECAUSE THE
ANIMALS ARE
CONSIDERED
TO BE THE
SPRINGER'S
POSSESSIONS.
IF YOU TAKE
THEM OUT
YOURSELF,
THEN IT'LL BE
CONSIDERED
STEALING!

YOU
YOU
CAN'T
TERRIBLY-
GUN

SO
GIVE
THEM
OUT

I WON'T RECOGNIZE
A LAW THAT
TREATS THEM AS
SOMEONE'S
BELONGINGS!!

IT'S
NOT
THE LAW

I hope you enjoyed the chapter!

CHAPTER 113:

**THE BIRTHPLACE
OF PETS**

BECAUSE
THE LIFE
OF AN
ANIMAL
BELONGS
TO THE
ANIMAL
ITSELF!!

I WON'T
RECOGNIZE
A LAW THAT
TREATS THEM
AS SOMEONE'S
BELONGINGS!!

AS I
THOUGHT
YOU WERE
JUST THE
MAN I
EXPECTED
YOU TO BE

YES—
SHOU
WA—
SANDO

FU
FU
FU

NOT
THINKING
NOW

I'M
SO
HA-
PPY

IN ANY CASE,
I'M GONNA
SO SAVE THEM.
NO MATTER
WHAT!

I CAN'T JUST
LEAVE THEM
ALONE, WHILE
KNOWING
THAT THEY'RE
SUFFERING...

WH, WHAT
SHOULD
WE DO,
PROFESSOR
SYOUDO...

IF HE GOES AND
TAKES THE
ANIMALS AWAY
FROM THE
BREEDER'S PLACE,
THEN HE'LL
DEFINITELY BE
CHARGED WITH
LARCENY...

ALTHOUGH
HE MIGHT
WANT TO
STEAL THEM
AWAY, HE
DIDN'T EVEN
KNOW THE
BREEDER'S
ADDRESS, SO
HE CAN'T.

W, WELL,
I THINK
IT SHOULD
BE OKAY...

BUT THE STORE ONLY SELLS THE ANIMALS, WHILE THE TRUE PROBLEM LIES WITH THE WHOLESALE SELLER OF THEM, THE BREEDER.

OF COURSE, HE MAY BE ABLE TO FIGURE OUT WHERE THE PET SHOP IS IF HE ASKS THE OWNED.

THE HEALTH CENTRE THAT PERFORMED THE ON-SITE INSPECTION TREATS THE BREEDER'S ADDRESS AS PERSONAL INFORMATION, SO THEY WON'T GIVE IT TO HIM.

AND HE LIKELY HAS NO OTHER WAY OF FINDING OUT THE ADDRESS.

NOW THAT YOU MENTION IT, THAT'S TRUE. WHAT A RELIEF...

HE HAS A FRIEND IN THE POLICE FORCE...

THERE'S NO MEANING IN DOING ANYTHING UNLESS SOMETHING IS DONE ABOUT THE BREEDER.

AND THAT IS SOMETHING HE SHOULD UNDERSTAND ONCE HE CALMS DOWN AND THINKS ABOUT IT...

SO LONG AS THE HEALTH CENTRE HAS REPORTED THEM TO THE POLICE, THE POLICE WILL KNOW OF THE BREEDER'S LOCATION.

HIS NAME IS DYUNJI YANOU, AND HE'S A LONG-TIME FRIEND OF TESSHOU-KUN'S.

TESSHO-KUN

PROFESSOR
WOULD YOU
LEAVE THIS
MATTER TO
ME?

IF
TESSHO-KUN
HAPPENS
TO REALIZE
THAT... AND
GOES TO
THAT
FRIEND TO
ASK HIM
FOR THE
INFORMA-
TION...

TESSHO-KUN

YES

CAN
YOU
REALLY
DO
THAT...

I WILL
GO AND
PERSUA-
DE HIM
TO STOP!

~~~~~

I HAVE  
AN IDEA

BY WHICH I MEAN

I DIDN'T THINK THAT  
THE HEALTH CENTRE  
WOULDN'T TELL ME  
WHERE THE BREEDING  
LOCATION IS.

PLE...

WHY NOT? PLEASE!  
TELL ME!!

SHALL  
I TELL  
YOU?

IF I DON'T KNOW  
WHERE IT IS, THEN  
SAVING THEM IS  
OUT OF THE QUESTION

DAMMIT  
WHAT  
SHOULD  
I DO?

IF I HAVE MY FRIEND  
IN THE PET INDUSTRY  
LOOK IT UP, THEN I  
COULD PROBABLY  
FIND OUT WHERE  
THE BREEDING  
LOCATION IS.

BUT I  
HAVE  
ONE  
CONDI-  
TION.

REALLY?  
THAT'D  
REALLY  
HELP!

EVEN  
WITHOUT  
STEALING  
THEM, THERE  
IS ONE WAY  
TO HAVE  
THE BREEDER  
LEGALLY  
JUDGED

I WANT  
YOU TO  
PROMISE  
ME THAT  
YOU DEFIN-  
ITELY WILL  
NOT STEAL  
ANY  
ANIMALS!

DURING THE  
HEALTH CENTRE'S  
ON-SITE  
INSPECTION,  
THEY  
COULDN'T  
FIND EVIDENCE  
OF THAT.

BUT THE  
OPPONENT  
IS A BREEDER  
UNDER  
SNO-  
YOU...

BUT STARVING  
THE ANIMALS,  
OR MEANING-  
LESSLY  
KILLING THEM  
IS A GREATER  
PELONY.

UNDER THE  
CURRENT  
ANIMAL  
WELFARE  
LAWS, IF THE  
BREEDING  
AREA IS  
POOR, THEN  
EVERYTHING  
CAN BE  
SETTLED  
BY PAYING  
A 300,000  
YEN FINE...

IF WE CAN  
FIND  
EVIDENCE OF  
THAT, THEN  
WE CAN  
HAVE THE  
BREEDER  
SENT TO  
JAIL!

IT IS HIGHLY  
POSSIBLE  
THAT THEY  
WOULD  
SLAUGHTER  
ALL  
UNNECESSARY  
ANIMALS!

IF YOU CAN  
ACCEPT THIS  
CONDITION, THEN  
I'LL TELL YOU  
THE LOCATION.

IN  
LOCATION.

HWO  
WEP?

SO  
THAT WAS  
POSSIBLE  
TOO...

I WILL  
ALSO  
HELP  
YOU.

IT'S FINE,  
I'VE BEEN  
RIDING A  
BIKE SINCE  
I WAS 16.

Ah, that's  
right.

SO  
IT'S  
HERE.

AH, THAT'S  
DANGEROUS  
TERRAIN  
BECAUSE  
IT'S A  
MOUNTAIN  
PATH, YOU  
SHOULDN'T  
GO SO  
FAST.

HEH... IT LOOKS LIKE A NORMAL HOUSE...

IS THIS REALLY ALRIGHT, TESS-HO?

I'VE BEEN FAR AWAY OF THE WORLD SINCE THE BEGINNING!

WHAT ARE YOU SAYING?

THIS PLACE IS UNDER SHIPPYOU'S INFLUENCE, SO INFILTRATING IT WILL DEFINITELY BE DANGEROUS...

BUT... THE PROBLEM IS HOW TO SNEAK IN...

ARE  
THAT'S NOT A  
PROBLEM AT ALL

ALL OF  
THE  
WINDOWS  
HAVE  
BARS ON  
THEM

AND WE  
CAN'T  
REALLY JUST  
WALK IN  
FROM THE  
FRONT DOOR

ALRIGHT,  
LET'S  
GO

WHAT  
DO YOU  
MEAN  
IT'S NOT A  
PROBLEM?

IT'S  
SIMPLE,  
IF YOU  
JUST DO  
THIS...

AFTER THAT,  
IF YOU PUT  
TAPE ON THE  
GLASS CLOSE  
TO THE  
LOCKING  
DEVICE, AND  
PUT THE BAR  
THROUGH IT...

BAR IN THE SHAPE DON'T  
COME OFF IF YOU JUST  
PULL THEM. THEY ARE  
GLUED INTO THE WINDOW  
FRAME, SO THEY'LL  
REACH DEEPER.

THESE  
KINDS OF  
BARS ARE  
REALLY  
ONLY TO  
WARD YOU  
OFF, SO  
IF YOU  
JUST PULL  
THEM HARD  
ENOUGH,  
THEY COME  
OFF EASILY.

IF THEY  
WERE REALLY  
THINKING  
ABOUT  
SECURITY,  
THEY SHOULD HAVE  
INSTALLED  
THESE KINDS  
OF BARS  
INSTEAD.

YOU SHOULD NEVER WASTE TIME  
IF YOU HAVE SPECIAL BARS ON YOUR  
HOUSE FOR CRIME PREVENTION PURPOSES.  
WE RECOMMEND THAT YOU CHANGE THEM  
AND IF YOU STICK A SECURITY FILM ON THE  
GLASS, OR HAVE SECURITY GLASS  
INSTALLED, IT WILL BE MUCH SAFER.

YOU CAN  
UNLOCK THE  
WINDOW  
WITHOUT  
MAKING  
ANY NOISE!

14

THIS DOG WAS  
KILLED  
IN A  
PIT  
IN A  
BOSTON  
AREA THAT  
ARMED THE  
ARMED  
ARMED  
ARMED  
ARMED  
ARMED

I'LL LEAVE THIS ROOM TO YOU TRY TO FIND THE CORPSE OF A SLAM-HEADED DOG.

I'M GOING TO INVESTIGATE THE OTHER ROOMS.

IT'S HORRIBLE, TOO HORRIBLE.

LIKE THIS, THEY WON'T EVEN KNOW WHY OF FOR WHAT REASON THEY WERE BORN.

YOU ALL WERE NEVER BORN IN ORDER TO HAVE TO FACE THESE KINDS OF HARDSHIPS.

JUST NOW, THE HELL, DO THEY KEEP THEM TO MAKE THEM LIKE THIS.

THIS APPEARANCE, WHERE YOU CAN'T EVEN TELL IF IT'S A DOG OR ANYMORE.

TES-  
SHOU  
IWA-  
SHIRO

I'M A  
VETER-  
INARIAN  
...!!

WHAT ARE  
YOU  
GETTING  
FLUSTERED  
FOR?  
GETTAHN  
HIM WITH  
FORCE!!

WH  
WHAT  
ARE

I WON'T  
LET YOU  
GET IN  
MY  
WAY...

I'M  
GONNA  
HELP  
THESE  
GUYS  
NOW...

A BIT  
YOU  
SAID?

OO  
OO  
OO  
OO  
OO  
HH  
HH  
HH  
HH  
!!!
